

No Child Left Behind

Title I, Part A – Improving the Academic Achievement of the Disadvantaged – Basic Programs

How Achieve3000 Supports Title I, A Requirements

KidBiz3000 (grades 2-5) and **TeenBiz3000** (grades 6-12), **Achieve3000's** Web-based literacy solutions, are built on decades of scientific research about how children learn to read. We provide differentiated learning solutions that improve reading, fluency, writing, technology skills, and interdisciplinary learning. **Achieve3000** can assist your district in utilizing Title I funds to meet the following requirements of NCLB:

1. Close the achievement gap by strengthening the core programs and providing academic and/or support services to low-achieving students at the elementary and high school levels, including academic assessments, as approved under NCLB in reading or language arts, mathematics, and science.

Achieve3000's philosophy is simple: Teaching students one-on-one, at their level, is one of the most powerful ways to help them reach their maximum potential and increase their academic achievement.

KidBiz3000 and **TeenBiz3000** use their own proprietary engine to extend the teacher's ability to reach every child. The programs include:

- Online Lexile® assessment tools that precisely identify students' needs
- Daily nonfiction reading content that is precisely and scientifically matched to each student's reading ability. A Spanish version makes the program accessible for English Language Learners.
- Anytime, anywhere access that gives students more time-on-task.

2. Provide instructional programs that have been created according to scientifically-based research to improve student

achievement and that enable students to meet challenging state standards.

Achieve3000 is based on the research of the National Reading Panel (NRP) and the National Writing Commission. **Achieve3000** Differentiated Instruction Solutions are scientifically proven to accelerate results in language arts instruction in the form of Lexile gains and dramatically increased scores on end-of-the-year standardized reading tests.

Achieve3000 Differentiated Instruction Solutions are fully aligned to state-specific standards in the content areas of ELA, Social Studies, Math, Science and Technology, as is our Professional Development Series.

3. Provide substantial opportunities for professional development to increase the ability of teachers to teach.

Achieve3000's Professional Development Series provides coursework in making use of research-based reading and writing strategies, enabling teachers to learn to promote fluency through deep understanding of content-area material.

Achieve3000 provides thousands of professional development and coaching sessions nationally each school year. Our professional development team consists of highly experienced educators with expertise in the use of differentiated instruction curricula and classroom strategies.

4. Provide programs that involve parents and afford them the opportunities to participate in the education of their children.

The **Home Edition** of **KidBiz3000** and **TeenBiz3000** allows each student's parents/guardians to log in and participate in the program alongside the student. Parents/guardians receive regular, automated weekly reports about their student's activities, as well as daily e-mails with the same assignments provided to their student.

The **Home Edition** can be provided to a family in English or in Spanish. Teachers can communicate directly with parents/guardians using the included secure, simulated e-mail system.
