REPORT SAMPLER

Powerful reporting tools for teachers and leaders to drive instruction and maximize success.

ACHIEVE3000

ACHIEVE3000.COM
Achieve3000® is the leading literacy platform in blended learning programs today, with differentiated solutions that serve nearly three million students worldwide. Based on decades of scientific research, Achieve3000’s solutions for grades PreK-12 reach all students with grade-appropriate content delivered at 12 levels in English and 8 in Spanish. Achieve3000’s patented model of online differentiated instruction is proven to accelerate literacy gains for all students and prepare them for college and career success.

All Achieve3000 solutions include an initial assessment to identify students’ reading levels at the beginning of the program, as well as embedded assessments that continually measure student achievement throughout the school year. These formative assessments are built right into the instructional routine, ensuring ongoing progress monitoring and data-driven decision-making without taking away from instructional time.

The Achieve3000 Report Sampler provides an overview of the reports available for administrators, teachers and families. Actionable data is updated every day to help educators monitor the health of their implementation, leverage data to drive instruction and enlist families in their student’s success. All reports shown are available to both teachers and administrators with an Achieve3000 subscription. Additionally, administrators have access to Leadership Edition, an at-a-glance dashboard that provides key metrics to support a successful implementation.

For more information or a personalized Achieve3000 demonstration, contact info@achieve3000.com

Motivate and Engage Students

- Motivate positive student behaviors by setting goals
- With equity for all students, ensure that readers at every level have the opportunity to earn point and achievements

Points are earned for achievements within the 5-Step Literacy Routine or awarded by a teacher. Students always keep track of total lifetime points.

Students are recognized for quality work by earning achievements.

Students can monitor progress towards the 40-activity goal and performance within each step of the 5-Step Literacy Routine.
Student Ownership & Accountability

- Encourage independence by setting goals and allowing students to monitor their own progress

Through the Career Center, students can choose a career, set goals and track their Lexile growth.

Students can make meaning of their Lexile® level by keeping track of their progress towards a career goal.

On the My Lessons page, students can monitor progress of all assigned lessons and complete any missing lesson components.
Actionable Data at Your Fingertips

Robust tools to support all teachers:

- Powerful reporting tools empower teachers to leverage Achieve3000 data to drive instruction
- Access to real-time student data makes it quick and easy to monitor student progress
- Teacher resources make planning easier and ensure best practices are infused in every lesson
Which of my students are using the program?

How it helps:

- Find out which classes and students are using the program
- View usage by grade or school, then drill down even further to see progress for each individual student
- Track progress towards the 40-activity goal: Students who complete 40 activities per semester (80 per school year) can achieve 2X the expected reading gains

</table>
How are my students spending their time?

How it helps:

- Identify the components of the program students are using and the time they are spending on each component
- See total activities completed by class and by student, as well as hours on task
- View average activity performance by student

Monitor use of key program components such as the integrated reading strategy tools to accelerate Lexile gains.

Ensure students are maximizing their time on task by monitoring the percent of time spent in key program components.

Data is summarized by class; expand to see each individual student.

Indicates student is a Developing Reader and may require additional teacher support. Developing Readers remain at their current Lexile level until another LevelSet™ is administered.
How are my students progressing towards Achieve3000’s 40-activity usage goal?

How it helps:

- Track progress towards the 40-activity goal: Students who complete 40 activities per semester (80 per school year) can achieve 2X the expected reading gains
- Identify students who have reached the recommended 40-activity goal
- See how many activities students are completing on average weekly
- Monitor best-practice recommendations for first-try activity scores

Easily monitor the average first-try activity score by student. Research shows that students who score 75% or higher on the first try see the greatest Lexile growth.
How likely are my students to be on track for College & Career when the high stakes test is administered?

How it helps:

- Forecast student readiness for College and Career at the time your state assessment is administered
- See how students are progressing towards College and Career Lexile performance expectations and plan aggressive intervention where it's needed

*Based on College and Career Readiness benchmarks provided by MetaMetrics®
How are my students performing on standards?

How it helps:

- Review students' mastery of your state standards based on item responses
- See each student’s instructional recommendation
- Directly assign lessons for additional practice on specific standards

Students are grouped by their level of performance on each standard, informing optimal groups for teacher-led small-group instruction.

Directly assign lessons with additional practice opportunities for each standard.

Send lessons directly to a student’s Achieve3000 mailbox with one click.

Recommended assignments offer additional practice opportunities with the selected standard. Lists are personalized based on lessons students have not yet completed.
How has Lexile performance changed over time?

How it helps:

- Track monthly changes in Lexile level based on LevelSet scores and performance on multiple-choice activities
- Reduces additional testing of students; embedded assessments allow for ongoing progress monitoring without taking away from instructional time
- See completed activities by month and date of Lexile level adjustment

View what student’s predicted Lexile level will be at the time the LevelSet post-test is administered (typically in May).

See Lexile growth to date, updated monthly.

See how many multiple-choice activities each student has completed.

The number of completed activities each month links directly from the report to a detailed breakdown by student.

See student’s last Lexile adjustment.
How are my students performing on activities?

How it helps:

- Monitor students’ performance on activities relative to the target score of 75% or higher on average
- Identify students working in their instructional zone: Students who are applying themselves should receive first-try scores of 75% or higher on their first attempt

How can I differentiate my instruction based on NWEA MAP assessment results?*

How it helps:

- Easily import each school’s NWEA™ MAP® comprehensive data file (CDF) to generate an Achieve3000 MAP Informed Learning Path for each student
- See a summary of student RIT scores by goal and assign lessons based on RIT scores
- Use grouping for an easy way to work with students based on skill and concept performance within each goal

*NWEA integration is available to purchase as an add-on to your Achieve3000 solution.
How are my students performing on reading skills?

How it helps:

- Pinpoint skill gaps to inform instruction and accelerate learning
- See how students are performing on essential reading comprehension and vocabulary skills
- Inform instruction by identifying at a glance which students are mastering or struggling with specific skills

<table>

Making the Most of Your Implementation

- Dynamic dashboard fueled by daily student data makes it quick and easy to monitor the health of your implementation and demonstrate success on a daily basis
- See an easy at-a-glance overview of your districts, schools and teachers
- Plan on the go with access anytime, anywhere and on any device
- 21 Key Metric cards focus on essential performance and usage data to drive a successful implementation

21 Key Metrics to monitor data at a glance

**Activity**
- Activities per week
- Average score
- Students per activity range
- Students scoring 75% or higher on 1st try

**College and Career Readiness**
- Students on track (Current)
- Students on track (Initial)

**LevelSet**
- Post-test score
- Pre-test score
- Students who completed the post-test
- Students who completed the pre-test

**Lexiles**
- Gains in Lexiles
- Lexile measure

**Logins**
- Number of student logins
- Number of teacher logins
- Student logins during/Outside school hours
- Students who logged in during the date range
- Teacher logins during/Outside school hours
- Teachers who logged in during the date range

**Time Spent**
- In Activities
- In Articles
- In Thought Questions
Identify Trends and Areas that Need Attention

How it helps:

- Compare performance by school, grade level, teacher or class
- Monitor trends by day, week or month

The Comparisons chart compares performance on key metrics across schools, grades, classes and teachers.

The Trends chart allows you to monitor trends across time and see variation by day, week or month.

Filters focus your data by date, school, grade, teacher or class.
Performance Reports Delivered Monthly*

Achieve3000 Performance Reports are distributed to district and school administrators mid-month, every month after implementation has started:

- At-a-glance view allows you to track student progress and monitor the success of your implementation
- Delivered directly to your email inbox each month

Use this data to monitor your students’ progress towards college and career readiness over the course of the school year.

*APRs are delivered every month during the school year, excluding February and June.
Regularly Monitor Implementation Success

- School and district reports include implementation messages and data highlights organized by school, grade or class, depending on recipient.

Monitor program usage in key areas (by class and total for all classes) for your Achieve3000 implementation.

See students’ forecast for performance on your state assessment based on current Lexile measures.

Note: Forecasting report only available for select states.

Compare the actual number of activities completed against the activity completion goal of 2 per week (8 per month), plus monitor progress to ensure maximum Lexile gains.
Engage Families with the Home Edition

- Designed to support family literacy and available in English and Spanish
- Increases family involvement and extends the reading experience beyond the school day
- The included Home Resource Site is available in 23 languages and helps parents understand what they can do to support their children

Program work allows parents to see lessons and activity performance for all of their children enrolled in Achieve3000.

Usage and Performance reports for families provide parents with access to key metrics for their children, including how their Lexile level has grown over time.

Family members can view the lessons their children are currently assigned and adjust the Lexile level to support their own literacy needs.

The simulated email system fosters three-way communication, allowing families, students and teachers to engage in conversations.
Partner with Families to Increase Reading Gains

How it helps:

- Targeted usage and performance reports help families monitor their children’s progress and empower them to get involved in their children’s learning.

**How it helps:**

- Partner with Families to Increase Reading Gains
  - Home Edition
  - Empower them to get involved in their children’s learning.

**Targeted usage and performance reports help families monitor their children’s progress.**

**1 Independent research has found that 40 sessions is a key benchmark for academic improvement.**

- For significant gains, Achieve3000 recommends that students complete one to two reading activities per week.

**Based on the Lexile score, student is a Developing Reader and will have sustained practice at the current Lexile level.**

**Administer an interim LevelSet assessment at mid-year to measure progress and update the Lexile level in the program.**

**Second Try**

- Students without a Lexile level for the current school year will not have a forecast for College and Career readiness.

**Monthly changes in Lexile levels.**

**Families can track their children’s monthly changes in Lexile levels.**

**How are my children spending their time?**

- Identify the components of the program which users are utilizing.

**Families can see how their children are spending their time in Achieve3000.**

**How has Lexile performance changed over time?**

- Track changes in Lexile/reading activity performance over time.

**Families can view activity performance and lesson details for their children.**

**View activities and scores.**

**Activities and scores.**
